

Creating your film set

Background

You can create a film set using a variety of backgrounds. First consider what kind of movie you are making – drama, space, fantasy, adventure – and then have a look around your house to see what you think would work well.

You can use one of your LEGO sets as a background, or even a LEGO box! There are lots of backgrounds that you can download from

lego.com/en-au/themes/letsbuildtogether/backgrounds

You can also create your own background by creating a drawing, or even head outside and use you garden for an authentic "jungle look"!

Film set using an existing LEGO build
